

FAQ

HOW TO DEAL WITH DIRTY FLOORING

Solution

- Use neutral detergent to clean the flooring
- Use sanding machine (polisher) with double-side carbide sanding disc (mesh size 60) to polish the flooring surface
- Polish (if no hollowing happened)

Measures to avoid

Wax the flooring. Wax not only close the flooring surface, avoid it from scratch and dust, but also make the maintenance easily.

- Preventive care: About 90% soiling can be avoided using an effective and correctly dimensioned entrance mat
- Daily cleaning: Mop and clean water (or neutral detergent)
- Monthly/quarterly cleaning: Remove the old wax and wax the flooring again.

How to wax

- *Clean the flooring surface*
- *Mix wax with water (according to wax instructions), use wax mop to well distributed the wax onto the flooring (wipe wax towards one direction)*

How to remove the wax

- *Clean the flooring surface*
- *Mix wax stripper (Suggest product 3M wax stripper) with water (according to wax instructions), pull the liquid onto flooring and wait 5-10 mins*
- *Use special polisher polish the wax and clean with wet/dry dust collector*
- *Clean the flooring with clear water and wait it dry*
